1. [redacted] was up to brief me on the [redacted] case. [redacted] is a JOT who had been destined for administration and now wants to go to ORR.) I told [redacted] I had no further interest in [redacted] as an individual. The question in my mind is whether we are going to give JOTs fifteen months of training and then permit them to go into an Agency component where no benefit whatever would be derived from such training. If permitting [redacted] to go to ORR sets a bad precedent along these lines, then probably it should not be allowed. In any case, I told [redacted] I would defer to Matt Baird's judgment and that I would be glad to discuss it with Baird when he returns from [redacted] after the holidays.

3. Also discussed Mr. [redacted] assignment with [redacted] and emphasized that [redacted] was not to be used on small and relatively unimportant assignments. On the contrary, he is to be cut in as fully as possible on everything that [redacted] does, and specifically he is to be the coordinator on the [redacted] program. I also suggested that he be brought in as close contact as possible with the project and program planning business in the DD/P organization. In principle, it is our objective, through on-the-job-training, to have him developed so that in a minimum length of time he is capable of performing at the GS-16 level in the general administrative and support business.
